I keep hearing more negativity in my head while on x if I don't like this or that . It's weird.

This could be the sim . Or potentially something else.

People probably think I'm crazy.

I keep hearing voices in my head threatening me . one just said " I'll make u and ur small town world go away" it's weird .

and then I get physical nausea and mom coughs . is this psychosis

or an ancestor sim being crazy

I took my last antipsychotic from the Dr. and am going to bed. I don't know where these thoughts or conversational thoughts are coming from. but it's never been like this before. I think I'm going insane. I dont feel crazy. but I hear these inner monologues , then they mess with my body manifesting like I said as nausea or addrenaline.

if it's me vs a sim there's really not much I can do.

The voices are getting increasingly more hostile. Every time I insult tech . One even said I live on gov assistance and so on. The old arguments.. I have no idea where these other voices come from, I know technically esp may be real. But my heart is leading toward the simulation.

voices r getting more hostile I could have sworn the sim made me throw up and said next time it'd be ur heart.

shits crazy

u don't believe me ?
